GUIDELINES & RULES FOR THE TAURANGA AUDIO-VISUAL SALON 2019

Conducted by the Tauranga Photographic Society inc. of New Zealand

GUIDELINES

DEFINITION of an AUDIO-VISUAL

An Audio Visual (AV) is a sequence of primarily still photographs with accompanying audio built around a storyline or theme. An effective sequence will have unity of these elements - the storyline, the visuals and the audio. These elements should reinforce each other, such that any one without the others would be inadequate. The sequence should have an introduction, an interesting development of the storyline and a close. Narrative, text and graphics may be used. The Audio Visual medium is very flexible and artistic expression within it can take many forms. It is much more than images to music.

CATEGORIES

1. Theme: An AV which develops an idea. It still has a structure or development of the idea but because it doesn't have factual detail or specific information it is probably not going to fit into the documentary category. In many cases it could almost be thought of as Open
2. Documentary: An AV with strong factual content, for example about a place or event.
3. Music, Poetry and Song: An AV which clearly illustrates a piece of music, a poem or a song. This may be creative or strongly representational.
4. The World of Nature: An AV entered into this category will be about a natural phenomenon, event, issue or feature. Human elements may be included as long as they relate strictly to the theme of the AV and play a supporting role. The nature story must be the main focus of the AV and it is at the judges' discretion whether there is too much emphasis on the human element.
